

Domino C-Series

Drop On Demand coding for efficiency and reliability

The C-Series range utilises Domino's printing and fluids technology experience of more than 30 years. Enabling you to print high quality graphics and supply chain readable codes at high volume, the C-Series is a globally established solution for your secondary coding requirements.

Print at high speeds and use less ink with Domino's new high contrast 907BK ink

Expert coding

- Our experience ensures that the C-Series provide full GSI compliant supply chain solutions with the optional Bar Code Validation Kit providing additional peace of mind

Easy to live with

- Networking the printer allows you to quickly access all your messages from a centralised database
- Gain extra flexibility by creating your own corporate brand at the last stage of your production line

Easy to use

- Continuous production, even during fluid replenishment
- Great value, achieve as many as 300,000 prints per 2 litre bottle, depending on the complexity of the message and ink type
- Improved planning by creating your codes in advance on a networked PC and downloading them directly to the printer
