## DIVISION

### RESEARCH and DEVELOPMENT

A team of engineers, in collaboration with the Arol R&D team and with international research centres, develops innovative solutions in order to meet customers' needs.

### DESIGN

The design is entirely realized by specialized teams that follow, coordinated by our Project Managers, all aspects regarding the system development. The project starts with an analysis of the customer's request and then move on to the realization of the system in the mechanical, electrical and software departments.

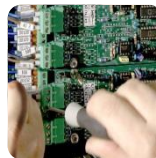

# FT SYSTEM AROL GROUP HEADQUARTER

## DIVISION

### ASSEMBLY & WIRING

All systems are assembled and wired in our facility to have a constant quality control during the production process.

### QUALITY CONTROL & TESTING

Before being delivered to customers all the systems we produce are started up and tested in our facility, simulating on our testing lines the line working conditions.

# FT SYSTEM AROL GROUP HEADQUARTER

## DIVISION

### SHOWROOM & TRAINING AREA

An area of our facility is dedicated to the exhibition of our main systems, so that customers can take vision, conduct tests and follow technical training courses for operators and line technicians.

### MEETING & TRAINING ROOM

Area for business meeting and training rooms (for training courses on the use of our systems) provide maximum flexibility in order to meet customer's needs.

### AFTER SALES

The after sales department guarantees the complete management of all services that we offer to the customer

- Installation and commissioning
- Complete training program
- Phone and On-Line 24hs support
- Immediate intervention of our technicians for repair or maintenance
- Spare parts management
- Software/Hardware update services
