

EMPTY KEGS INSPECTOR

IK700_1-VA-OR

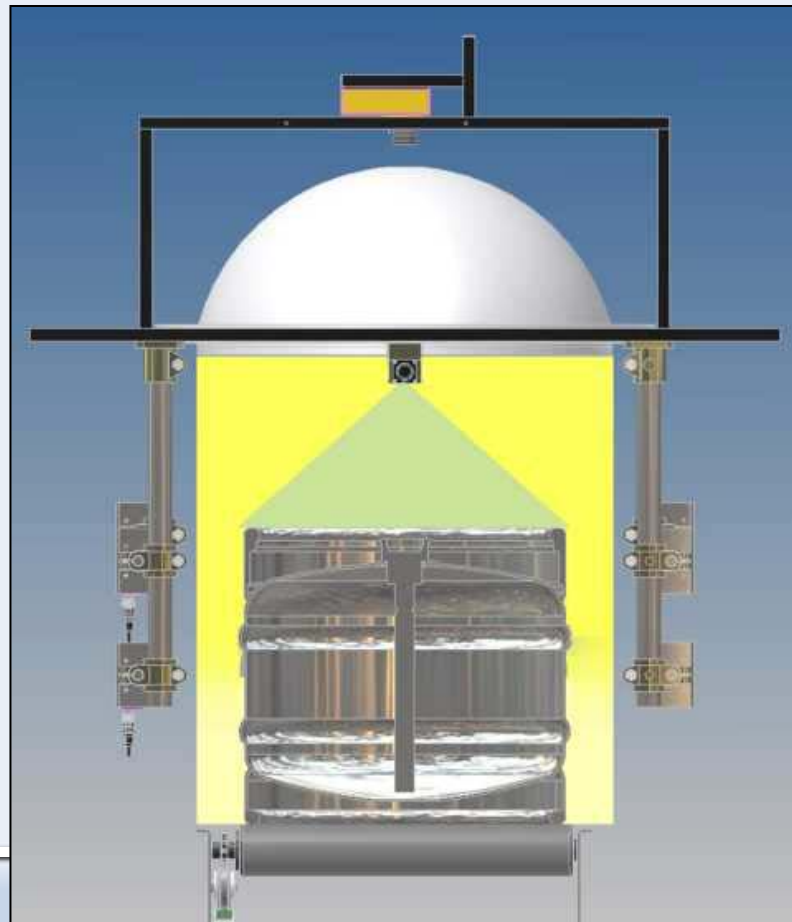

EMPTY KEGS INSPECTOR

Suitable to verify:

- ❖ excessive deformations
- ❖ absence of conformity of the kegs at the return after the depalletizing process

EMPTY KEGS INSPECTOR

EMPTY KEGS INSPECTOR

“RIM” DEFORMATION

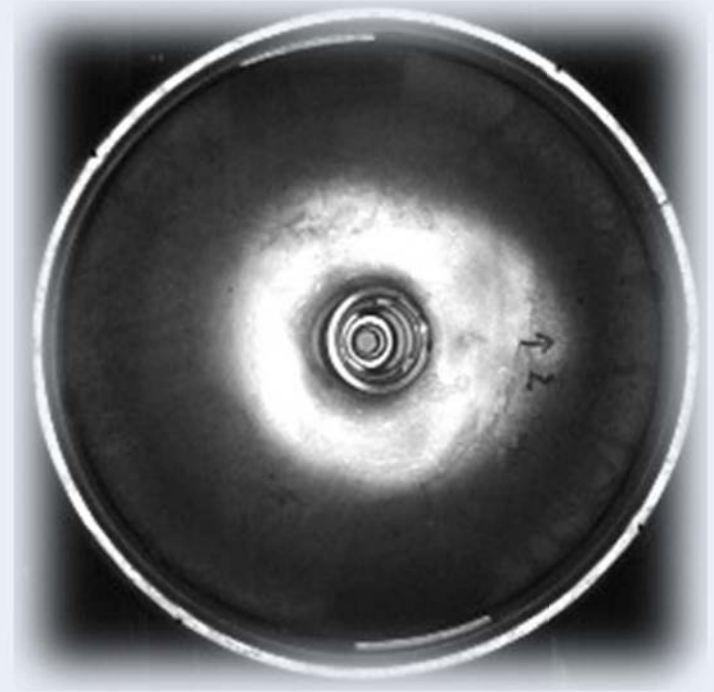

“RIM” DEFORMATION

Verify the container integrity - flange deformations (“rim”)

EMPTY KEGS INSPECTOR

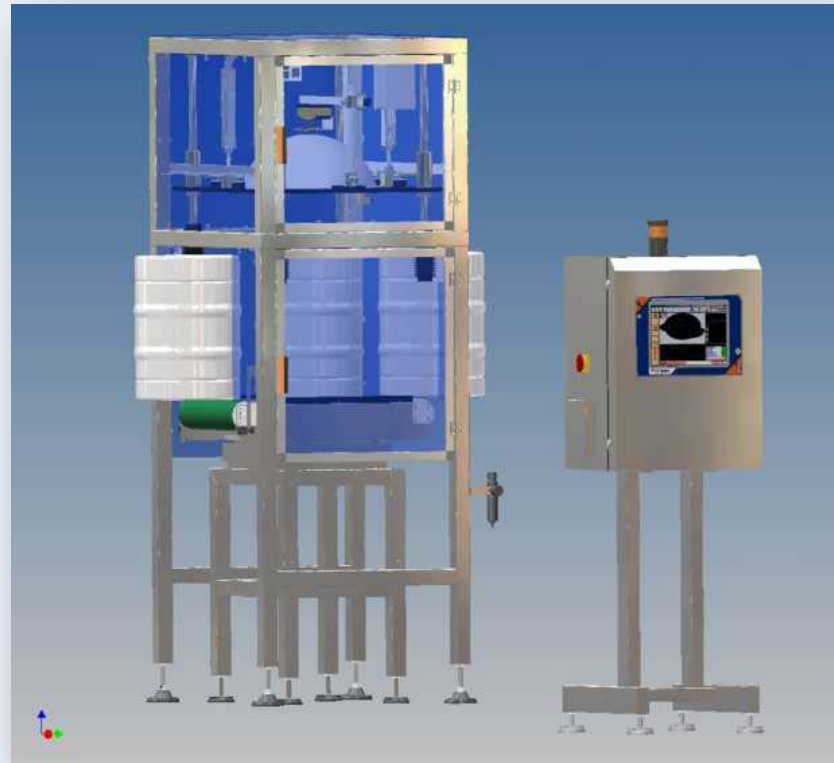

FITTING WITHOUT FILLING VALVE

INCLINED FITTING

Verify fitting presence, detection and deformation

EMPTY KEGS INSPECTOR

INSPECTION MATCHED WITH THE WEIGHT CHECKING SYSTEM

EMPTY KEGS INSPECTOR

- ❖ Automatic inspection of the total production
- ❖ Time saving in the selection of the kegs park
- ❖ Improvement and general optimization of production times
- ❖ It guarantees the integrity of kegs (absence of rim and fitting deformations)
- ❖ It guarantees the correct seal after the filling
- ❖ Highly-professional system particularly designed to meet any line requirement
